

Cygnus Smoke & Heat Detection Infographic

© Checkpoint Products 1800 273 473

1. **Cygnus Smoke and Heat Detectors are constantly active - even after hours.**
2. **When fire is detected they instantly send message via Wireless Network to Cygnus Control Panel**
3. **Site wide notification can be programmed to activate if required.**

4. **Cygnus Control Panel sounds alert and displays location of fire**
5. **Message sent to Staff or Third Party Security (optional)**
4. **Incident automatically logged and recorded with Time, Date and Location**
